

MEXICAN SUNFLOWER

Tithonia rotundifolia

ECHO® PLANT INFORMATION SHEET

Description

A shrub with large green leaves and dark orange flowers. Plant height is shorter than *T. diversifolia*. It is often introduced for its attractive flowers and it grows 1m tall. It grows on most soils and is moderately resistant to drought. Provide well-drained soil in full sun. Stake if necessary and shelter from strong winds. **CAUTION:** We caution against planting Tithonia where it does not already exist as it can become weedy.
