

MORA

Morus sp.

Moraceae

ECHO® FICHA DE INFORMACIÓN SOBRE PLANTAS

Descripción

Asia

Origen

In addition to jackfruit, breadfruit, and figs, mulberries belong to the family Moraceae, which contains approximately 40 genera and 1,000 species. While there is much debate on exactly how many taxa belong to the genus *Morus*, there are approximately 64 species currently acknowledged, the majority of which occur in Asia.

Usos

The fruit is delicious, sweet, with a strong mulberry flavor and a hint of tanginess

The large leaves are great for feeding greens loving animals like tortoises
